INTERAVIA

World Review of Aviation and Astronautics

Contents for Year 1964

GENERAL SUBJECTS

No. 1 **VTOL: State of the Art**
Inertial Navigation for Aircraft and Ships
Europe's Australian Space Centre

No. 2 **The Vital Role of Air Reconnaissance**
Sweden's Road-based Air Force
The Tilt-wing CL-84

No. 3 **Into the Supersonic Transport Era**
Swedish Electronics Developments
New Missiles and Drones

No. 4 **Germany's Aerospace Industry**
Sikorsky S-61R and Vertol Chinook
The Laser: Principles and Applications

No. 5 **Space and American Security**
The Laser (II): Military and Space Applications

No. 6 **France's Force de Frappe**
Command and Control Systems in the USA
Fifth German Air Show

No. 7 **Business Aircraft**
Pakistan and China Visited
The Controversial XB-70

No. 8 **Modern Pilot Training**
New Counter-Insurgency Aircraft
Europa 1—ELDO Satellite Launch Vehicle

No. 9 **British Aircraft Industry 1964**
Presenting the IATA Airlines
Air Freight is a Marketing Process
Supplement: BAC One-Eleven

No. 10 **Air Freight Handling Facilities**
Review of Turbine Powered Freighters
Air Traffic Control in the USA

No. 11 **Farnborough Commentary**
Electronics on a Missile Base
Saab 37 Viggen—Sweden's Major Weapons Programme

No. 12 **F-111A and YF-12A—The USAF Looks to the Future**
The Czechoslovakian Aviation Industry's Programme
Air Traffic Control in the USA

INDEX BY SUBJECTS

1. International Organisations

IATA's 20th Annual General Meeting in Bogota —J. P. Ortega: 9/1320
IATA and its 93 members: 9/1322
Two decades of IATA facilitation effort—A. Lawrence Young: 9/1339
IATA Committee, Sub-Committee and Working Group membership: 9/1340
IATA's 20th Annual General Meeting—Surprises at Bogota: 11/1704

2. Defence and Political

The cost of progress: 2/179
US prunes defence expenditure: 3/291
Into the supersonic transport era—Transition faces the airlines: 3/312
Washington master-plans SST development: 3/315
Britain's new service aircraft plans: 4/451
Utopian or not?—Germany's national space programme: 4/481
Five new USAF aircraft projects: 5/623
The Germano-Italian G.91 successor: 5/623
Space and American security—New pattern in nuclear strategy?: 5/641
France's force de frappe: 6/797
The balance sheet of the French deterrent: 6/799
The ELDO programme—An example of international cooperation: 8/1143
Collaboration—but how?: 9/1283
Aviation and defence at the cross-roads—D. Wood: 9/1284
Multilateral confusion: 10/1461
The Air Force 1964-65 budget (Sweden): 11/1688

3. Civil Aviation

Pilots' briefing on the SST: 2/161
The cost of progress: 2/179
Aviation in East Africa—H. L. Adams: 2/227
Air Union talks again: 3/311
Into the supersonic transport era—Transition faces the airlines: 3/312
Washington master-plans SST development: 3/315
Boeing, Lockheed or North American?—Three SST projects compete: 3/316
FAA Administrator Halaby answers questions: 3/327
The charter airline's contribution—Low cost tourism with safety—J. E. D. Williams: 3/329
A new concept for short-haul air transports—Advanced boundary layer control for short field performance: 3/384
Mutual assurance for airlines—M. Summerskill: 4/450
The main objections to commercial supersonic aviation—B. K. O. Lundberg: 4/498
Stimulating short-haul transport—The FAA calls for proposals: 4/518
Alitalia's training centre—F. Molinari: 5/677
The airlines of the Chinese People's Republic: 5/717
Middle East Airlines and the Concorde: 5/718
American SST meets new obstacles: 6/828
PIA's new international links: 7/977
Eight days inside the Great Wall: 7/981
Report from the Select Committee on Nationalised Industries—British Overseas Airways Corporation: 8/1077
Modern flight training: 8/1095
Flight simulators—Indoor flying instruction and practice: 8/1105
Second International Forum for Air Cargo: 8/1128
A British United view of the One-Eleven—F. A. Laker: 9/1185
Why Braniff bought the BAC One-Eleven—Captain R. V. Carleton: 9/1187
Air freight is a marketing process: 9/1312
Freight operation: 9/1316
IATA's 20th Annual General Meeting in Bogota —J. P. Ortega: 9/1320
Presenting AVIANCA, this year's IATA host: 9/1320
IATA and its 93 members: 9/1322
IATA airlines' scheduled traffic—1963 year: 9/1323
Pillars of world air transport—a "Who's Who" of the International Air Transport Association: 9/1331
Two decades of IATA facilitation effort—A. L. Young: 9/1339
Organising for freight—Air freight terminals—the end links: 10/1462
Civil freight transports: 10/1467
The cross-Channel competition: 10/1472
Aeroflot's guests in good hands: 10/1499
IATA's 20th Annual General Meeting—Surprises at Bogota: 11/1704
The future of the VC.10—D. Wood: 12/1780
Aviation in Iceland: 12/1799
The international airlines' future—A. S. Boyd: 12/1852

4. Service Aviation

Advanced techniques but no decisions—The British Services and VTOL: 1/30
Forewarned is forearmed—A survey of aerial reconnaissance: 2/180
For deep tactical intelligence—The photo squadron in action: 2/186
The keen eyes of the army: 2/190
The Fairchild photo transmission system: 2/191
American reconnaissance drones: 2/192
The camera at war: 2/203
Low altitude forward obliques—New techniques give panoramic coverage: 2/206
The reconnaissance aircraft's sensors: 2/210
Sweden's road-based Air Force: 2/211
The US prunes defence expenditure: 3/291
What plans for the R.A.F.?: 3/291
Exercise Quick Release: 4/449
Britain's new service aircraft plans: 4/451
Which helicopter for the German Forces?—A major procurement programme awaits decision: 4/509

Five new USAF aircraft projects: 5/623
France's force de frappe: 6/797
The balance sheet of the French deterrent: 6/799
Mirage IIIC—With 13 Fighter Wing at Colmar: 6/807
The Swiss Air Force Mirage 3BS: 6/832
Electronics in military decision making: 6/849
The USA's national military command system: 6/854
US military C & C systems: 6/858
Communications networks for C & C systems: 6/860
Hamble—university of the air—E. C. Bates: 8/1100
A new era in USAF pilot training—Col. J. W. Little: 8/1102
Aviation and defence at the cross-roads—D. Wood: 9/1284
Fifty years of Swiss military aviation: 9/1311
NATO's new missile range on Crete: 9/1363
The Air Force 1964-65 budget (Sweden): 11/1688

5. Aircraft

a) Civil Aircraft

The Short Turbo-Skyvan: 1/106
The cost of progress: 2/179
Washington master-plans SST development: 3/315
Boeing, Lockheed or North American?—Three SST projects compete: 3/316
The builders of the Concorde report: 3/321
The aerodynamic concept of the Concorde—P. Satre: 3/321
Concorde structural and aerodynamic considerations—Dr. A. E. Russell: 3/323
An outline of the Concorde powerplant—T. P. Frost and J. P. Little: 3/325
FAA Administrator Halaby answers questions: 3/327
The Jet Commander Model 1121: 3/386
High altitude research—Development of the FFM 582: 4/484
Dornier pursues the Do 28D project: 4/493
Stimulating short-haul transport—The FAA calls for proposals: 4/518
High lift devices for short field performance: 4/569
News from the helicopter industry: 5/674
Middle East Airlines and the Concorde: 5/718
Greater Concord: 6/780
Russia's medium-range jet—The Tu-124: 6/817
American SST meets new obstacles: 6/828
Around Europe in record time with the HS.125: 7/957
The forward swept wing configuration of the HFB 320 Hansa: 7/960
The Hansa spreads its wings: 7/962
HFB 320 Hansa—technical characteristics: 7/962
Technical data for the principal business aircraft: 7/971
A new Concorde takes shape: 7/985
The BAC 221 research aircraft: 7/986
DC-9 progress report: 7/1014
Competitors for the short-haul market: 7/1016
VFW 614—A new transport project: 7/1017
The Lear proposal for a local service transport: 8/1057
Primary and advanced trainers: 8/1108
Agusta presents two new helicopters: 8/1126
The British United view of the One-Eleven—F. A. Laker: 9/1185
Why Braniff bought the BAC One-Eleven—R. V. Carleton: 9/1187
Origins and development of a short-haul transport: 9/1188
The One-Eleven flight control system: 9/1195
From the flight deck—E. K. Barnes: 9/1196
Equipment on the One-Eleven: 9/1198
A Caribou's world trip: 9/1318
Civil freight transports: 10/1467
Turbine powered transport aircraft for freight operation: 10/1471
Lockheed's big jet freighters—The L-300 and L-300 B: 10/1493
The fan jet Falcon: 10/1500
The Fokker F.28 Fellowship: 10/1542
DHC introduces the turboprop Twin Otter: 11/1663
Three nations to build the Fokker F.28: 11/1706
The future of the VC.10—D. Wood: 12/1780
Delfin and Cmelak, new aircraft from the Czechoslovakian industry—E. Baur: 12/1841

b) Military Aircraft

Advanced techniques but no decisions—The British Services and VTOL: 1/30
What price vertical take-off?: 1/47
Developing a fighter with swivelling engines: 1/53
The Dornier Do 31 jet transport: 1/59
The Sikorsky S.61R: 1/105
For deep tactical intelligence—The photo squadron in action: 2/186
Photographic and armed reconnaissance—The Mirage IIIR: 2/193
The Saab 105: 2/214
The Canadair CL-84 V/STOL aircraft—Problems of tilt-wing design: 2/233
Fixed or variable geometry wings?: 3/318
Fire control electronics for the J35F Draken: 3/371
Britain's first strategic fighter: 3/380
Lockheed's A-11—A Mach 3.5 surprise: 4/421
Britain's new service aircraft plans: 4/451
Which helicopter for the German Forces?—A major procurement programme awaits decision: 4/509
A tri-service helicopter—Sikorsky S-61R: 4/511
Sikorsky CH-3C technical data: 4/513
The Vertol CH-47A Chinook: 4/514
Design data for the Boeing/Vertol CH-47A Chinook helicopter with 2 Lycoming T55-L-7 turbines: 4/517
High lift devices for short field performance: 4/569
The Germano-Italian G.91 successor: 5/623
VTOL reconnaissance aircraft for the US Army: 5/652
Lockheed XV-4A: 5/653
The Ryan XV-5A: 5/655
The Skyhawk International: 5/672
News from the helicopter industry: 5/674
Research at Mach 8—North American X-15A-2: 5/706
The background to the Mirage IVA: 6/804
Manufacturers participating in the Mirage IVA programme: 6/804
Mirage IIIC—With 13 Fighter Wing at Colmar: 6/807
The Swiss Air Force Mirage 3BS: 6/832
Faster than a bullet—Premiere of the North American XB-70A: 7/982
Bölkow helicopter developments: 7/1020
Primary and advanced trainers: 8/1108
COIN—An aircraft for peace and war: 8/1119
Martin's COIN proposal: 8/1121
Agusta presents two new helicopters: 8/1126
A battle zone helicopter—The Sud Aviation SA.330: 8/1134
A Caribou's world trip: 9/1319
The XC-142A V/STOL transport starts flight tests: 9/1368
A-70—America's latest aircraft programme: 9/1370
North American wins COIN competition: 10/1502
The DHC-5 Buffalo—A new STOL transport: 10/1536
Electronics on the TSR.2: 11/1640
Sweden's biggest weapons programme—System 37 goes ahead: 11/1687
XB-70A and TSR.2—Initial flights: 11/1703
A versatile weapons system—First analysis of the F-111: 12/1776
SAAB 105 in production: 12/1802
America's most discussed aircraft—YF-12A: 12/1806
Delfin and Cmelak, new aircraft from the Czechoslovakian industry—E. Baur: 12/1841

6. Guided missiles and rockets

Rockets, missiles and space vehicles: 1/108, 3/352, 4/567, 5/710, 6/820, 8/1149, 9/1366, 10/1538, 11/1698, 12/1836
ASTOR—A wire guided torpedo for ASW: 1/109
American reconnaissance drones: 2/192
Ship-to-air defence weapon—A closer look at Seacat: 2/236
Second Atlas-Centaur launch successful: 2/238
The high cost of exploring the moon — Saturn SA-5 and Ranger 6: 3/292
Two target drones in one—Redhead/Roadrunner: 3/347
New drone developments: 3/350
Rubis—Experimental rocket and probe: 3/353
The SUBROC missile system: 3/354
Space and American Security—New pattern in nuclear strategy?: 5/641
Bantam—a Swedish infantry anti-tank missile: 5/708
The lunar programme progresses—Saturn SA-6: 7/943
The ELDO programme—An example of international cooperation: 8/1143
The Europa I booster: 8/1145
Ranger 7—the moon in close-up: 9/1249
NATO's new missile range on Crete: 9/1363
US launch vehicles: 10/1540
Arrangement of a British satellite launcher: 11/1576
Successful Saturn/Apollo SA-7 launch: 11/1593
Focus on missiles (Farnborough '64): 11/1628
Electronics around the missile—A. R. Lombardo: 11/1643
Missile-carrying patrol boats—New weapons for the Soviet Navy—D. J. Ritchie: 12/1831

7. Powerplants

The swivelling engine pod: 1/55
Thrust combinations for vertical lift and cruise—L. von Bonin: 1/63
An outline of the Concorde powerplant—T. P. Frost and J. P. Little: 3/325
After-sales service for the Rolls-Royce Spey—A. G. Bowling: 9/1193
The Daimler-Benz PTL 6 turbine—Dr.-Ing. B. Eckert: 9/1383
Two propeller turbine engines in competition for COIN (T74, T76): 10/1503
Britain's latest aero-engines: 11/1626
The Allison T-78, the first regenerative propeller turbine: 11/1690
The hybrid rocket engine—B. Ankarswärd: 12/1838
Engines for future subsonic civil aircraft—A. A. Lombard: 12/1847

8. Electronics

Electronics in aviation and industry: 1/110, 2/240, 3/377, 4/557, 7/1009, 9/1374, 12/1812
SINS for surface ships and submarines: 1/75
Inertial navigation for civil aviation—Donald Nadler: 1/78
Better gyros for inertial systems: 1/80
Inertial navigation—Technical terms: 1/81
Automatic teleprinter message switching centres—Joachim H. Thurmann: 2/243
Fire control electronics for the J35F Draken: 3/371
A modern radar data display and digital processing system—DIGITRAC: 3/374
Swedish developments in inertial navigation: 3/376
The Laser—Principle and applications—M. N. Russell: 4/560
The Laser (II)—Military and space applications—M. N. Russell: 5/701
The Decca AR-1 radar: 5/712
Secondary radar in the USA—B. R. Newman: 5/714
The laboratories of Bendix Systems Division: 6/824
Electronics in military decision making: 6/849
The USA's national military command system—6/854
US military C & C systems: 6/858
Communications networks for C & C systems: 6/860
German Air Show 1964—Electronics—predominantly military: 6/891
The design of a multiple role A.T.C. radar—R. L. Burr and A. M. Patrick: 8/1152
A three-dimensional tactical radar—The Sperry AN/TPS-34: 8/1156
Equipment on the One-Eleven: 9/1198
British flight recorder developments: 9/1296

Flight data recording—The philosophy of a new concept—T. Brooke-Smith: 9/1297
C.S.F.'s Cyrano II fire control radar: 9/1376
Air traffic control in the USA: 10/1525
Automation of air traffic control in Holland—O. J. Selis: 10/1531
Bendix microvision—A new all-weather landing aid: 10/1534
Navigational systems for hovercraft—R. B. Michele and M. G. Pearson: 10/1543
Some 300 equipment manufacturers competing for the world market: 11/1629
New products from the British electronics industry: 11/1639
Electronics on the TSR.2: 11/1640
Electronics around the missile—A. R. Lombardo: 11/1643
Air traffic control in the USA (Part 2): 12/1808

9. Astronautics

Rockets, missiles and space vehicles: 1/108, 3/352, 4/567, 5/701, 6/820, 8/1149, 9/1366, 10/1538, 11/1698, 12/1836
Woomera—Europe's space outpost—D. Wood: 1/100
Second Atlas-Centaur launch successful: 2/238
The high cost of exploring the moon—Saturn SA-5 and Ranger 6: 3/292
Germany's contribution to the European space programme: 4/479
Utopian or not?—Germany's national space programme: 4/481
The lunar programme progresses: Saturn SA-6: 7/943
The ELDO programme, an example of international cooperation: 8/1143
The Europa I booster: 8/1145
US launch vehicles: 10/1540
The Syncom 3 Olympic satellite: 10/1546
Arrangement of a British satellite launcher: 11/1576
Successful Saturn/Apollo SA-7 launch: 11/1593
Three-man space flight: 12/1757
Explorer 22 in orbit: 12/1835

10. Non-electronic Equipment

Equipment, Materials, Techniques: 3/356, 4/564, 6/822, 7/1012, 8/1158, 11/1700
The Fairchild photo transmission system: 2/191
The laboratories of Bendix Systems Division: 6/824
Hanover—The equipment stands: 6/889
Equipment on the One-Eleven: 9/1198
Freight operation: 9/1316
Organising for freight—Air freight terminals—the end links: 10/1462
Some 300 equipment manufacturers competing for the world market: 11/1629
Fire-resistant aircraft hydraulic fluids—C. Davidson: 12/1850

11. Airports and Airport Equipment

The Turin Show and the 2nd Airport Equipment Exhibition: 5/669 and 8/1124
Two decades of IATA facilitation effort: A. L. Young: 9/1339
Moscow's gates to world air traffic: 10/1496
Airport construction in the CSSR: 12/1790

12. Research and Technical—Hydrofoils

Developing a fighter with swivelling engines: 1/53
The swivelling engine pod: 1/55
Thrust combinations for vertical lift and cruise—L. von Bonin: 1/63
Long skirts improve obstacle clearance—R. Stanton Jones: 2/230
Fixed or variable geometry wings?: 3/318
The aerodynamic concept of the Concorde—P. Satre: 3/321
Concorde structural and aerodynamic considerations—Dr. A. E. Russell: 3/323
An outline of the Concorde powerplant—T. P. Frost and J. P. Little: 3/325
A new concept for short-haul air transports—Advanced boundary layer control for short field performance: 3/384
High altitude research—Development of the FFM 582: 4/484
Dornier pursues the Do 28D project: 4/493
The main objections to commercial supersonic aviation—B. K. O. Lundberg: 4/498
Which helicopter for the German Forces?—A major procurement programme awaits decision: 4/509
High lift devices for short field performance: 4/569
VTOL reconnaissance aircraft for the US Army: 5/653
The Ryan XV-5A: 5/655
Research at Mach 8—North American X-15A-2: 5/706
American SST meets new obstacles: 6/828
The forward swept wing configuration of the HFB 320 Hansa: 7/961
Faster than a bullet—Premiere of the North American XB-70A: 7/982
A new Concorde takes shape: 7/985
The BAC 221 research aircraft: 7/986
DC-9 progress report: 7/1014
VFW 614—A new transport project: 7/1017
Bölkow helicopter developments: 7/1020
Origins and development of a short-haul transport: 9/1188
The XC-142A V/STOL transport starts flight tests: 9/1368
A-7A America's latest aircraft programme: 9/1370
Lockheed's big jet fighters—the L-300 and L-300B: 10/1493
The fan jet Falcon: 10/1500
The DHC-5 Buffalo—a new STOL transport: 10/1536
From tourist attraction to oceanographic research—J. R. Dean: 10/1541
The Allison T-78, the first regenerative propeller turbine: 11/1690
The present and future status of the hydrofoil—K. Büller: 11/1692
Aquavion hydrofoil projects: 11/1696
Sonic booms: 12/1784
The hybrid rocket engine—B. Ankarswärd: 12/1838

13. Industry

List of members of the West German Aerospace Industries Federation: 4/452
Germany's aerospace industry: 4/469
Projects and production of the German aerospace industry (airframes): 4/474
Germany's contribution to the European space programme: 4/479
From the autopilot to the spectrophotometer—Ten years' activity at Bodenseewerk Perkin-Elmer & Co. GmbH: 4/496
German Air Show 1964: 6/881
Prospects for British light aircraft—P. Masefield: 7/964
Agusta presents two new helicopters: 8/1126
A Spring tour of the French aeronautical industry—J. de Galard: 8/1159
Aviation and defence at the cross-roads—Derek Wood: 9/1284
Britain's aviation industry: 9/1289
Farnborough 1964—A view of the 24th SBAC show: 11/1619
Some 300 equipment manufacturers competing for the world market: 11/1629
Sweden's biggest weapons programme—System 37 goes ahead: 11/1687
SAAB 105 in production: 12/1802

14. Exhibitions, Congresses, Meetings

The Turin Air Show and the 2nd Airport Equipment Exhibition: 5/669 and 8/1124
German Air Show 1964: 6/881
The Equipment stands at Hanover: 6/889
Electronics—Predominantly military (Hanover): 6/891
The Third International Light Aircraft Show at Cannes: 7/972
Farnborough 1964—A view of the 24th SBAC show: 11/1619
Farnborough '64—Britain's latest aero-engines: 11/1626
Farnborough '64—Focus on missiles: 11/1628
Rockford '64: 11/1702

15. Miscellaneous

Interavia Air Letter reports . . .: 1/19, 2/143, 3/275, 4/423, 5/597, 6/753, 7/925, 8/1058, 9/1231, 10/1423, 11/1575, 12/1739
What's in the Air?: 1/112, 2/215, 3/358, 4/520, 5/680, 6/810, 7/988, 8/1130, 9/1307, 10/1504, 11/1666, 12/1786
Viewpoint: 1/29, 3/294, 4/422, 5/624, 6/779, 7/944, 8/1078, 9/1250, 10/1444, 11/1594, 12/1758
Book reviews: 1/115, 2/247, 5/719, 8/1164, 9/1387, 10/1545, 11/1707
Readers' Letters: 1/115, 2/162, 5/520, 7/1025, 8/1165, 9/1387, 11/1706, 12/1853
Flying for Farming: 1/83
Gliding research in the space age: 1/86
Aviation in Polar regions—A look at Greenland: 1/88
USS High Point enters service: 1/99
Long skirts improve obstacle clearance—R. Stanton Jones: 2/230
Half a century of aviation insurance—P. G. Reiss: 3/387
Alitalia's training centre—F. Molinari: 5/677
The laboratories of Bendix Systems Division: 6/824
Business in the air: 7/953
Light aircraft prices: 7/957
A private pilot in Europe—K. Pischl: 7/958
Prospects for British light aircraft—P. Masefield: 7/964
The world's business and private aircraft: 7/966
Modern flight training: 8/1095
A.S.T. Perth—An international training school—F. D. Nugent: 8/1098
Hamble—university of the air—E. C. Bates: 8/1100
A new era in USAF pilot training—J. W. Little: 8/1102
Flight simulators—Indoor flying instruction and practice: 8/1105
Primary and advanced trainers: 8/1108
From tourist attraction to oceanographic research—J. R. Dean: 10/1541
Navigational systems for hovercraft—R. B. Michele and M. G. Pearson: 10/1543
Air cushion vehicle—Westland's hovercraft plans: 11/1664

16. Tables

List of members of the West German Aerospace Industries Federation: 4/452
Projects and production of the German aerospace industry (airframes): 4/474
Sikorsky CH-3C technical data: 4/513
Design data for the Boeing/Vertol CH-47A Chinook helicopter with 2 Lycoming T55-L-7 turbines: 4/517
Manufacturers participating in the Mirage IVA programme: 6/804
US military C & C systems: 6/858
Light aircraft prices: 7/957
HFB 320 Hansa: technical characteristics: 7/962
Technical data for the principal business aircraft: 7/971
Turbine powered transport aircraft for freight operation: 10/1471
US launch vehicles: 10/1540

INDEX OF AUTHORS

Adams, H. L.—Aviation in East Africa: 2/227
Ankarswärd, B.—The Hybrid Rocket Engine: 12/1838

Barnes, E. K.—From the Flight Deck: 9/1196
Bates, E. C.—Hamble—University of the Air: 8/1100
Baur, E.—Delfin and Cmelak, New Aircraft from the Czechoslovakian Industry: 12/1841
Bonin, L. von—Thrust Combinations for Vertical Lift and Cruise: 1/63
Bowling, A. G.—After-Sales Service for the Rolls-Royce Spey: 9/1193
Boyd, A. S.—The International Airlines' Future: 12/1852
Brooke-Smith, T.—Flight Data Recording—The Philosophy of a New Concept: 9/1297
Büller, K.—The Present and Future Status of the Hydrofoil: 11/1692
Burr, R. L. and Patrick, A. M.—Design of a Multiple Role A.T.C. Radar: 9/1152

Carleton, Captain R. V.—Why Braniff Bought the BAC One-Eleven: 9/1187

Davidson, C.—Fire-Resistant Aircraft Hydraulic Fluids: 12/1850
Dean, J. R.—From Tourist Attraction to Oceanographic Research?: 10/1541

Eckert, B.—The Daimler-Benz PTL 6 Turbine: 9/1383

Frost, T. P. and Little, J. P.: An Outline of the Concorde Powerplant: 3/325

Galard, J. de—A Spring Tour of the French Aeronautical Industry: 8/1159

Jones, R. Stanton—Long Skirts Improve Obstacle Clearance: 2/230

Laker, F. A.—A British United View of the One-Eleven: 9/1185
Little, Colonel J. W.—A New Era in USAF Pilot Training: 8/1102
Little, J. P. and Frost, T. P.—An Outline of the Concorde Powerplant: 3/325
Lombard, A. A.—Engines for Future Subsonic Civil Aircraft: 12/1847
Lombardo, A. R.—Electronics Around the Missile: 11/1643
Lundberg, B.—The Main Objections to Commercial Supersonic Aviation: 4/498

Masefield, P.—Prospects for British Light Aircraft: 7/964
Michele, R. B. and Pearson, M. G.—Navigational Systems for Hovercraft: 10/1543
Molinari, F.—Alitalia's Training Centre: 5/677

Nadler, D.—Inertial Navigation for Civil Aviation: 1/78
Newman, B. R.—Secondary Radar in the USA: 5/714
Nugent, F. D.—A.S.T. Perth, An International Training School: 8/1098

Ortega, J. P.—IATA's 20th Annual General Meeting in Bogota: 9/1320

Patrick, A. M. and Burr, R. L.—Design of a Multiple Role A.T.C. Radar: 9/1152
Pearson, M. G. and Michele, R. B.—Navigational Systems for Hovercraft: 10/1543
Pischl, K.—A Private Pilot In Europe 7/958

Reiss, P. G.—Half a Century of Aviation Insurance: 3/387
Ritchie, D. J.—Missile-Carrying Patrol Boats—New Weapons for the Soviet Navy: 12/1831
Ruddick, R. G.—PIA's New International Links
Russell, Dr. A. E.—Concorde Structural and Aerodynamic Considerations: 3/323
Russell, M. N.—The Laser: Principles and Applications: 4/560; The Laser: Military and Space Applications: 4/701

Satre, P.—The Aerodynamic Conception of the Concorde: 3/321
Selis, O. J.—Automation of Air Traffic Control in Holland: 10/1531
Summerskill, M.—Mutual Insurance for Airlines: 4/450

Thurmann, J. H.—Automatic Teleprinter Message Switching Centres: 2/243

Williams, J. E. D.—Low Cost Tourism with Safety: 3/329
